

MANORMA SHARMA

Software Engineer (Full Stack — React.js / Node.js)

Delhi 110041 | +91 8512893890 | mannu0501@gmail.com | Portfolio: manormasharma.github.io/Portfolio | LinkedIn: linkedin.com/in/manorma-sharma

PROFESSIONAL SUMMARY

Software Engineer with 5+ years building production-scale web applications across React.js, Node.js, and cloud technologies. Experienced across the full stack — from component architecture, state management, and performance optimization (Core Web Vitals, code splitting, CDN delivery) to Node.js/Express backends, REST APIs, and secure authentication with JWT and RBAC. Track record of leading architecture redesigns, delivering measurable performance gains, and mentoring engineers across fast-paced, cross-functional teams.

CORE SKILLS

Frontend Architecture • Cross-Functional Communication • Requirement Analysis • Agile/Scrum Delivery • CI/CD Automation & IaC (Terraform) • Technical Mentorship & Code Reviews • Cloud Infrastructure & Scalable Deployment • Analytical & Critical Thinking

TECHNICAL SKILLS

- Frontend: React.js, Next.js, Redux, Redux Toolkit, React Hooks, Tailwind CSS, Material UI, Bootstrap, Responsive & Mobile-First Design
- Backend: Node.js, Express.js, REST APIs, GraphQL (familiar), JWT Authentication, Role-Based Access Control (RBAC), Microservices
- Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3/SCSS
- Databases: MongoDB, SQL, Firebase (familiar)
- Cloud & DevOps: AWS (CloudFront, S3), Microsoft Azure, Docker, CI/CD, GitHub Actions, Terraform, Version Control (Git)
- Performance & Quality: Web Core Vitals, Lazy Loading, Code Splitting, CDN Caching, Pagination, SEO, Cross-Browser Testing, WCAG Accessibility, Unit Testing
- AI & GenAI: Google ADK, MCP, Agentic AI, RAG, Ollama, ChromaDB, Gemini API, OpenAI API, Claude API
- Tools & Methodologies: Git, GitHub, Bitbucket, Jira, Asana, Agile/Scrum, Code Reviews

WORK HISTORY

Software Development Engineer

08/2024 – Current

HUMBEE — Noida, India

- Led frontend architecture redesign of a multi-role B2B platform serving distributors, dealers, retailers, and manufacturers, supporting 4 distinct user roles across a single React.js codebase
- Built and standardized 30+ reusable React.js components, improving development velocity and cutting new-feature build time
- Improved Web Core Vitals and reduced page load time by ~30% through lazy loading, code splitting, and CDN caching
- Implemented secure JWT authentication and Role-Based Access Control (RBAC) across all platform user types
- Integrated Adobe Marketo for automated lead capture, reducing manual marketing handoffs and improving lead-to-workflow turnaround
- Configured AWS CloudFront CDN for optimized global content delivery, reducing asset latency for end users
- Collaborated cross-functionally with backend and DevOps teams to streamline deployment pipelines and improve release scalability

Senior Web Developer

01/2024 – 07/2024

Brickwork — Bengaluru, India

- Gathered and translated requirements from US-based enterprise clients into scalable CMS solutions on tight delivery timelines
- Developed and customized enterprise web applications using Crownpeak CMS for multiple client accounts

- Improved application performance and stability through structured refactoring, debugging, and code review
- Delivered features within Agile sprints, coordinating with cross-functional and distributed teams

Freelance Web Developer

05/2023 – 03/2024

US-Based Event Technology Platform — Remote

- Developed responsive event websites and attendee management systems for enterprise clients
- Built dynamic registration workflows and role-based access control systems for high-traffic events
- Delivered and optimized high-traffic event platforms, ensuring stable performance during peak registration windows

Web UI Developer

05/2022 – 06/2023

HackerEarth — Bengaluru, India

- Migrated legacy WordPress applications to React.js using REST APIs, improving maintainability and load performance
- Integrated HubSpot for marketing automation and analytics, improving campaign tracking accuracy
- Improved SEO, accessibility (WCAG), and Web Core Vitals scores across key product pages
- Built reusable UI components aligned with the product roadmap, supporting faster feature delivery

Front-End Developer

11/2020 – 04/2022

Oceanic Studio — Delhi, India

- Developed responsive, cross-browser UI using HTML, CSS, and JavaScript for client-facing web products
- Customized WordPress themes and integrated backend APIs to extend site functionality
- Improved performance and maintainability through modular, component-based coding practices

PROJECTS & TECHNICAL EXPLORATION

TradeExpert — Multi-Agent Stock Analysis Assistant

- Developed a multi-agent stock analysis assistant in Python using Google ADK, supporting Gemini, Ollama, and LM Studio models
- Built AI-powered workflows for stock screening, company research, financial analysis, and market trend evaluation

Tech: Python, Google ADK, Gemini API, Ollama, LM Studio, Yahoo Finance API

AI-Text-Assistant — Privacy-First Local AI Assistant

- Built a privacy-first AI text assistant using React, Node.js, and Ollama for fully local LLM inference with no external API calls
- Implemented text enhancement features including summarization, rewriting, grammar correction, and content generation

Tech: React, Node.js, Ollama

Homelab Infrastructure Setup

- Built and maintained a Proxmox-based homelab with Docker and Linux containers
- Deployed self-hosted apps (AdGuardHome, Traefik, n8n, Portainer) with reverse proxy and SSL
- Designed private subnet architecture with NAT, DHCP, DNS filtering, port forwarding, and LAN segmentation

Tech: Proxmox, Docker, Linux, Traefik, AdGuardHome, NAT, DHCP, DNS, n8n

AWARDS

- Kudos Award — HackerEarth, for Outstanding Performance

EDUCATION

Bachelor of Computer Applications (BCA), Computer Science — 06/2022

IGNOU, Delhi, India

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals — 07/2022

LANGUAGES

Hindi • English
